To our valued customers using Broach Holder

Since 1st of July, 2006, we have supplied the Broach Holders as *1 environmentally compatible products , but unfortunately have found a minor issue with the Nut 8x30 TP15253 equipped with the Broach Holder that the amount of Hexavalent chromium contained in the plating exceeds the allowed limits in the NITTO KOHKI Group Green Procurement Standard.

We herewith report to you details and apologize for any inconvenience caused on this matter, However there will be no effect on the performance of the products that you are using now.

For more information, please contact us anytime.
