

TOCHIGI NITTO KOHKI CO., LTD.

Evolving, NITTO KOHKI GROUP's key plant.

TOCHIGI NITTO KOHKI is a subsidiary of the NITTO KOHKI GROUP which is listed on the Prime Market of the Tokyo Stock Exchange.

We produce a wide variety of products with an abundant facilities and highly specialized technical capabilities. We handle a wide range of products and we are expanding the field of activity. We produce products; quick connect couplings CUPLA allows for quick and secure connection/ disconnection of various fluid lines such as air, water, oil and chemicals. ; pumps with compact structure to supply quiet and clean fluid; medical equipments, MEDO series, applying the pumps' technology.

We also began production of HHV CUPLA used to supply compressed hydrogen for fuel-cell vehicles that has been attracting attention recently, for the first time in Japan.

Under the slogan of "Focused on you," we will continue to strive for product with pride in manufacturing from the customer's perspective.

Top Message

Aiming for people and eco-friendly manufacturing.

Since the beginning of business in 1977, we have been producing numerous equipment that contribute society with highly specialized technical capabilities over 40 years.

What is the company we aim for is to contribute to the development of the industry and a prosperous life with technology from the perspective of the use.

We believe that our missions are to seek the new needs of the industrial world and to improve our product technology, quality, and services to a level that earns further recognition from customers in the global marketplace.

As a key factory with the largest production capacity in the NITTO KOHKI GROUP, TOCHIGI NITTO KOHKI is committed to pursuing user- and eco-friendly manufacturing in compliance with the law with a spirit of challenge.

We will work as one to keep growing.

Takashi Chiba
Representative Director, President

About TOCHIGI NITTO KOHKI

Technology and quality that support the production of products that benefit people.

The Creative Technology Realized Energy and Labor-saving

TOCHIGI NITTO KOHKI has a sophisticated, streamlined, coherent production system from parts processing and product assembly to the inspection of finished products. Our company is also equipped with self-developed auto assembly robots, auto inspection system and many other facilities. We are constantly pursuing automated and labor-saving manufacturing technology that enable mass production with high quality, including the CUPLA auto assembly robots that can operate for up to 60 hours.

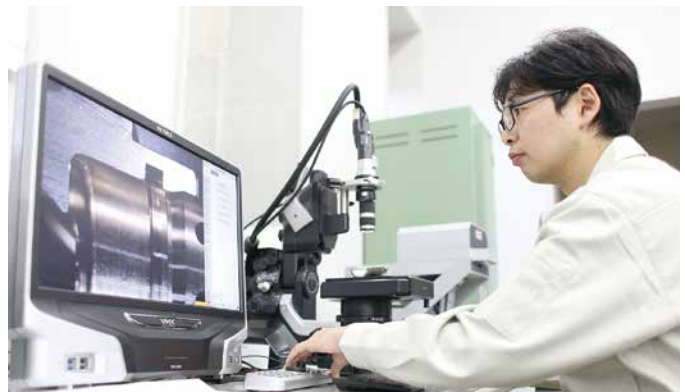

Improvement for Increasing the Productivity

We are continuously engaged in activities with all employees to improve quality, delivery date and cost reduction. We maintain 5S (Sorting, Setting-in-Order, Shining, Standardizing, Sustaining the Discipline) at a high level. We use an integrated manufacturing system from parts processing and product assembly to the inspection of finished products and packing products to shipping products.

Careful Inspection Is Proof of High Quality

In every region of the world and in every work environment, we continue our commitment for quality that our products will bring 100% functionality. On the assumption that people use our products in harsh environments, we determine the quality standards and check the basic performance under various operating conditions.

Product Line-up

Contribute to industry with wide variety of products.

For more information, scan the QR code.

Quick Connect Couplings CUPLA

Quick connect couplings CUPLA allows for quick and secure connection/ disconnection of various fluid lines. It is used across the world such as factories for automobiles, electric appliances, semiconductor and food with a large product lineup of approximately 25000.

We have responded to customer demands and we can also handle special-order production of CUPLA from various industries.

Usage examples

Pneumatic tool piping, factories' compressed air piping, metal molds, hydraulic equipment, etc.

The fueling coupling for high pressure hydrogen, HHV CUPLA

Compressors & Pumps

We provide trust and security to our customers by supplying energy-efficient and compact pumps—including linear motor driven free piston type pumps—for clean transportation of fluids in many fields.

Usage examples

Endoscope, inhaler and supply and transportation of liquids ink, etc.

Compressor/pump series

Medical Equipment

Medical equipment, MEDO series, applying the pumps' technology help to contribute to keep people's health.

Usage examples

Circulation of the blood, recovery from fatigue etc.

Doctor MEDOMER DM-4S

 TOCHIGI NITTO KOHKI
Home page

Origin of Corporate Name

Expresses the founder's passion for technology.

Our name is a Japanese acronym taken from the company's location in eastern Japan (**N**ippon no **to**-bu), its mission to produce labor-saving tools (**ko**-gu), and the founder's name (**Miki**ya).

In addition, when written in Japanese, this name is comprised of four bisymmetrical characters, representing our wish to be the well-balanced, creative company as it grows.

Corporate Motto and Action Principles

The word "development" in the corporate motto carries four meanings: "products that contribute to society," "sales markets," "human resources," and "system for organization management."

Striving to realize these objectives energizes the company's management culture and ensures ongoing development of the business. In other words, such endeavors constitute "insurance."

| | |
|--------------------------|--|
| Corporate Motto | Development provides corporate insurance. |
| Action Principles | Mobilize creativity and accumulate technology. Cultivate morale and accumulate vitality. Act with complete sincerity and accumulate people's confidence. |
| Management Policy | Contribution to society Employee's well-being Corporate development |

Corporate History

| | |
|----------------|--|
| June 1977 | NITTO KOHKI begins operation of the Ujiiie plant. |
| May 1979 | Acquires the permit for production of medical equipment. |
| January 1981 | Acquires the factory certification for the UL standard. |
| October 1985 | Acquires the approval from The High-Pressure Gas Safety Institute of Japan (bulk CUPLA). |
| November 1990 | Launches the TPM activity. |
| October 1994 | Receives the TPM Excellent Award. |
| November 1995 | Acquires the ISO9002 certification. |
| April 1997 | Transfers production of blowers for septic tanks to NITTO KOHKI INDUSTRY (THAILAND). |
| May 2000 | Established TOCHIGI NITTO KOHKI CO., LTD |
| October 2000 | Begins operation as TOCHIGI NITTO KOHKI. after company split-up. |
| November 2001 | Acquires the ISO14001 certification. |
| January 2003 | Partially transfers production of CUPLA to NITTO KOHKI INDUSTRY (THAILAND). |
| November 2003 | Acquires the upper-level ISO9001 certification. |
| June 2004 | Launches the PI activity. |
| September 2014 | Acquires the ISO13485 certification. |
| December 2017 | Completes the office building. |

TOCHIGI NITTO KOHKI CO., LTD.
Environmental Activities

We want to be a company that grows with society and the local community. We take part in community activities, such as periodic cleaning activities in the area around the company and volunteer tree planting, to actively contribute to the realization of sustainable society.

Environmental Policy

1. We implement business activities based on the basic principles of environmental preservation in consideration of the impact on the global environment. The company and affiliated companies on the premises work as one to promote environmental conservation activities.
2. We comply with laws and regulations, as well as our promises to the society. We comply with ISO14001, to ensure effective use of resources and reduce impact on the environment, as well as to continuously strive to pursue continuous environmental management and environmental conservation.
3. We strive to disseminate products useful for the conservation of the global environment through developed product functions and technology of NITTO KOHKI CO., LTD.
4. We assess the environmental impact of our business activities. We identify facilities and technologies that have a significant environmental impact by setting environmental objectives and goals to continuously prevent pollution and protect resources.
 - 1) We promote the effective use of energy, paper, and other resources.
 - 2) We promote the recycling of paper, oil, waste plastics, and waste wooden materials.
 - 3) We thoughtfully manage related facilities to prevent the release of hazardous substances.
 - 4) We ensure the operation and management in consideration of eliminating waste.
 - 5) We ensure the control of environmental control substances that may cause adverse effects to the global environment and human.
5. We make efforts to continuously improve the environmental management system and environmental performance through internal environmental audit.
6. We implement training to raise awareness toward the global environmental conservation, as well as to participate in environmental conservation activities in the community that employees can take part casually.
7. We also disclose this environmental policy document to outside the company.

April 1, 2022
Masaki Takahashi, Plant Manager

Awards

Received TPM challenge award.

By the achievement of our PM campaign, Japan Institute of Plant Maintenance certified us as a high standard plant.

Acquires Certifications

Acquires the ISO9001 certification.

Certification No. JQA-1039

Acquires the ISO14001 certification.

Certification No. JQA-EM1934

Acquires the ISO13485 certification.

Certification No. JQA-MD0148
