

CORPORATE PROFILE
TOHOKU NITTO KOHKI CO., LTD.

A Manufacturing Hub Born in Fukushima City.

TOHOKU NITTO KOHKI is a subsidiary of the NITTO KOHKI Group which is listed on the Prime Market of the Tokyo Stock Exchange. Our facility combines extensive equipment with specialized technical expertise to produce power and machine tools, electric screwdrivers, and door closers.

Our product range serves diverse industries, from the ATRA ACE and JET CHISEL that power construction sites and factories, to the “delvo” electric screwdriver for precision assembly work and door closers that ensure quiet, controlled closure. Our manufacturing operations strive to meet customer needs.

Achieving Labor-saving through a Diverse Array of Machinery

Our diverse lineup of machinery enables us to process and assemble a variety of products to match customer specifications. In addition, through proprietary production equipment and ongoing automation initiatives, we have achieved significant energy and labor-saving across our entire plant.

Top Message

Aiming for people and eco-friendly manufacturing.

We believe that our mission is to grasp the new needs of society and raise the level of technology, quality, and service so that we receive greater recognition from the global market than ever before.

As the NITTO KOHKI Group's key plant, we will continue to work hard as one in our production operations and strive for manufacturing that is friendly to people and the environment.

Since our founding, we have continued to produce a variety of products that contributes to society by leveraging our abundant technological capabilities.

Our vision for the company is to contribute to industrial growth and the enrichment of lives through technology that enables smooth operation.

Takashi Chiba

Representative Director, President

Improvement for Increasing the Productivity

We are continuously engaged in activities with all employees to improve quality, delivery date and cost reduction. We maintain 5S (Sorting, Setting-in-Order, Shining, Standardizing, Sustaining the Discipline) at a high level. We use an integrated manufacturing system from parts processing and product assembly to the inspection of finished products and packing products to shipping products.

Careful Inspection Is Proof of High Quality

In every region of the world and in every work environment, we continue our commitment for quality that our products will bring 100% functionality. On the assumption that people use our products in harsh environments, we determine the quality standards and check the basic performance under various operating conditions.

Website

Product Line-up

Contribute to industry with wide variety of products.

Tools

Pneumatic Needle Scaler
JET CHISEL

Portable Magnetic Base
Drilling Machine
ATRA ACE

Annular Cutter JETBROACH

Portable Magnetic Base Drilling Machine ATRA ACE Power & Machine Tools (pneumatic, electric, hydraulic)

The ATRA ACE Portable Magnetic Base Drilling Machine drills holes into steel with speed and precision at bridge and tunnel construction sites.

Our power and machine tools support manufacturing operations at a multitude of sites, from steel processing and welding to deburring and finish sanding of parts and dies.

Usage
examples

Drilling for bridges and steel beams. Deburring, sanding, finishing after welding, and removing paint and rust.

delvo

S Series
(Variable speed type)

C Series
(Current control type)

Electric Screwdriver "delvo"

Electric Screwdriver "delvo" is used for assembling electronic equipment such as computers, smartphones and printers, in addition to automotive components. It realizes stable production of high-quality products by screwing small diameter screws with precise torque control.

Usage
examples

Assembling electronic equipment and automotive components.

AUTO-HINGE

Sliding Door Closer

AUTO-HINGE
Flag Type

Door Closer

AUTO-HINGE brands automatically close doors using hydraulic mechanisms and springs. Since they don't use door arms, they also make for a neat appearance.

Usage
examples

Fire doors, doors in public facilities, offices, and entrance gate.

JR Fukushima Station (West Exit)

Corporate History

Formerly SHIRAKAWA NITTO KOHKI (Shirakawa-shi)

| | |
|---------------|--|
| December 1979 | Established as Shirakawa Densai. |
| April 1982 | Started production of door closers. |
| April 1989 | Obtained UL certification for electric screwdrivers. |
| April 2000 | Became a group company of NITTO KOHKI and changed its name to SHIRAKAWA NITTO KOHKI. |

Formerly MEDOTECH (Yamagata-shi)

| | |
|----------------|---|
| February 1953 | Founded as Happy Precision Industry. |
| February 1959 | Certified as a JIS-approved factory for household sewing machine processing. |
| February 1969 | Started production of pneumatic tools and dual-purpose tapping and drill machine. |
| December 1972 | Started production of hydraulic machinery and tools. |
| January 1977 | Became a group company of NITTO KOHKI. |
| February 1982 | Started production of electric tools. |
| January 1984 | Started production of annular cutters. |
| September 1985 | Changed company name to MEDOTECH. |

TOHOKU NITTO KOHKI (Fukushima-shi)

| | |
|------------|--|
| March 2024 | SHIRAKAWA NITTO KOHKI and MEDOTECH merged, and was renamed TOHOKU NITTO KOHKI. |
| July 2025 | Completed construction of the Ozaso Plant in Fukushima City. |

Philosophy

NITTO KOHKI Group's Philosophy is comprised of three concepts: Corporate Motto, Action Principles and Management Policy, and indicates our approach towards corporate citizenship.

Corporate Motto

Development provides corporate insurance.

Action Principles

Mobilize creativity and accumulate technology.

Cultivate morale and accumulate vitality.

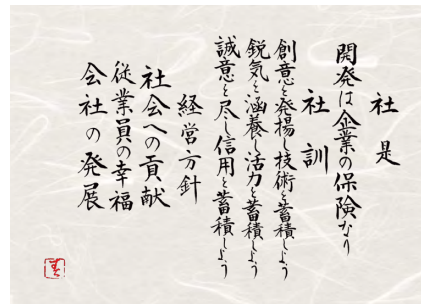

Act with complete sincerity and accumulate people's confidence.

Management Policy

Contribution to society

Employees' wellbeing

Corporate development

Employment and Training Initiatives

We are committed to growing alongside society and our community. Our proactive approach to recruiting and developing young talent has earned us "Youth Yell Certified Company" recognition for excellence in employment practices as a small- to mid-sized company. In addition, as part of our recruitment efforts, we hold regular school visits and company information sessions throughout Fukushima City.

NITTO KOHKI GROUP Basic Sustainability Policy

We aim to achieve the sustainability of society and the Company by implementing our Management Policy of "contribution to society," "employees' wellbeing," and "corporate development."

Our Management Policy involves "contribution to society," "employees' wellbeing," and "corporate development." First, we aim to contribute to society at large by developing, manufacturing, and selling creative products that meet the needs of the times based on the theme of "energy and labor-saving." Secondly, through our management activities, we aim for the wellbeing of our employees and their families. Finally, we aim to develop the Company by contributing to society and realizing the wellbeing of our employees. We believe that putting this into practice is synonymous with our goal of achieving both the sustainability of society and the sustainable.

Quality and Environment Policy

1. We establish quality and environmental management system for the manufacture of power and machine tools (power tools, pneumatic tools, hydraulic tools, consumable tools) and door closers.
2. We increase customer satisfaction and protect the environment, including the preservation of product quality.
3. We clarify business processes in corporate activities and improve operations.
4. We comply with laws, regulations, and other requirements.
5. We operate quality and environmental targets as issues. We conduct regular internal audits and management reviews and strive to continuously improve our quality and environmental management system consistent with our business activities.
6. We understand the impact that our business activities have on the environment, and strive to protect the environment, reduce the environmental impact, and prevent pollution.
7. We reduce waste and use resources efficiently.
8. We make these policies clearly known to all our employees and contractors on the premises working in our company. We disclose these policies.
