

Nitto Kohki Group Green Procurement Policy

Nitto Kohki Group strives to contribute to society through businesses related to "energy and labor-saving."

To build a sustainable supply chain, we have established the following policies and are committed to their implementation.

1. Fair and Transparent Procurement

We comply with all applicable laws and corporate ethics and provide fair opportunities to all business partners.

2. Ensuring Quality, Safety, and Stable Supply

We place top priority on quality and safety and work to maintain a stable supply while taking business continuity into account.

3. Promoting Environmental Responsibility

We comply with relevant laws and regulations and promote environmentally responsible procurement. This includes proper management of chemical substances—especially regulated substances—reducing environmental impact such as greenhouse gas emissions and promoting resource circulation.

4. Respect for Human Rights and Ethical Conduct

We respect international human rights principles and engage in ethical procurement that eliminates forced labor, child labor, and discrimination.

5. Collaboration with Business Partners

We regard our business partners as co-creators of value and work collaboratively through dialogue and continuous improvement to promote sustainable procurement.

To All Business Partners

Nitto Kohki Group requests that all business partners also comply with applicable laws and regulations, ensure stable supply, protect the environment, and respect human rights.

This policy applies to the procurement activities and business partners of all Nitto Kohki Group companies.
