

June 13, 2018

To our valued customers using our Pressure Gauge

Since July 1, 2006, we have supplied our Pressure Gauge as *1Environmental Products. However, unfortunately, we found a minor issue with its several parts that their Lead, Cadmium, or Hexavalent chromium content exceed the allowed limits determined in the Nitto Kohki group companies' Green Procurement Standard.

We sincerely apologize for the inconvenience we caused you with this matter. There is no effect on the performance of the products that you are using now. For more information, please contact us anytime.
