

To our valued customers using Dust Caps

We hope that all is well. We thank you very much for your patronage on our products.

Since July 1, 2006, we have supplied the coupler products (except Lever Lock Cupla) to be complied with the RoHS directive, but have found that some of the Dust Caps assembled on the “Line Cupla” and “Rotary Line Cupla” and the Dust Caps alone, produced or shipped before August, 2011 were not.

We herewith report to you, and apologize for any inconvenience caused on this matter.

If you need the Dust Caps that comply with the RoHS directive, we will supply the Dust Caps solely. The details are as follows, but should you have any questions, please contact below for further details.

Tel: +81-3-3755-9954

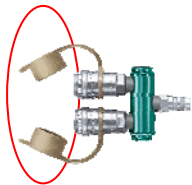

E-mail: overseas@nitto-kohki.co.jp

For your information, all of the Dust Caps being shipped now complies with the RoHS directive. None of the products that are being used at you now, will effect on the performance.

Dust Caps marked ○

[Rotary Line Cupla RT type]

[Rotary Line Cupla RE type]

[Dust Cap 20S-D]

※ Products and Dust Caps not shown above are not the object items.

■ Outline of occurrence and measures for prevention

Nitto Kohki has voluntarily manufactured the products to comply with the RoHS directive and have stated so on our product catalogue and also on our web site on the internet.

The object products were procured under RoHS certification from our suppliers, but we found some PVC (poly vinyl chloride) Dust Caps having excessive amount of Lead (additive).

We have taken this fact seriously, and from now on, we will take all possible measures for prevention by confirming the certifications strictly, making thorough inspections against our suppliers, and strengthening RoHS directive compliance inspection by using X-ray Fluorescence Analysis.

■ Action to be taken

We will send the RoHS compliant type (Dust Cap only) per request. Please send request to below contact.

We will start reception of request of RoHS compliant type (Dust Cap) from October 17, 2011.

■ Indication mark for RoHS compliant type

There is a round point on the tab of the Dust Cap

■ Contact for this matter
